EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech. CSE(HCI)	Indian Institute of Information Technology, Nagpur	7.35	2022-26

EXPERIENCE

Software Developer Intern – Segritech

Current

Tech: MERN, Django, REST APIs, MySQL, CRUD, ML, CVT, Flutter

Hybrid

- Migrated the existing segritech.com website from HTML, CSS, and JavaScript to a component-based React application for improved maintainability and scalability.
- Worked with a Django backend connected to SQL-based databases, implementing and consuming REST APIs for dynamic data handling and CRUD operations.
- Contributed to machine learning workflows focused on improving computer vision models through data preprocessing, model experimentation, and evaluation.
- Assisted in mobile application development tasks using Flutter, supporting feature implementation and UI integration.

PROJECTS

Prime Ticket : RailEase

NOV 2025 - JAN 2026

Tech: React.js, Express.js, Node.js, PostgreSQL, JWT, REST API, CRUD, Neon

[GitHub](#) | [Deploy](#)

- Built PrimeTicket, a full-stack online railway reservation system with user, admin roles, centralized PostgreSQL database design, and complete train, route, and ticket management.
- Developed secure authentication and modular REST APIs with JWT session handling, real-time train search, seat availability checks, fare calculations, ticket booking and cancellation.
- Deployed the frontend on Vercel for a live demo, delivering reliable data access and seamless ticket management across devices.

TalkToDine : Voice Reservation

JAN 2026 - FEB 2026

Tech Stack: MERN, Vite, CRUD, Restfull API's, Render, OpenWeather API

[GitHub](#) | [Deploy](#)

- Built a voice-driven restaurant table booking system using React and Node.js, enabling users to complete bookings through natural spoken conversation and uses openweather API for auto table location.
- Implemented real-time speech-to-text and text-to-speech interactions with a MongoDB Atlas, Node.js backend, and deployed the system on Render for a live, end-to-end demo.

VeloxChat : Chat App

AUG 2025 - NOV 2025

Tech Stack: React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Socket.IO, Tailwind CSS

[GitHub](#)

- VeloxChat – A real-time chat app built with the MERN stack, featuring JWT authentication, bcrypt security, MongoDB persistence, Socket.IO messaging, Redux state management, and a responsive Tailwind CSS interface for seamless cross-device use.
- A live chat system with 1-on-1/group messaging, typing indicators, and many concurrent users.

SKILLS

- **Languages:** C, C++, JavaScript, Python
- **CS Subjects:** DSA, OOP, OS, DBMS, Computer Networks, ML
- **Web Development:** HTML, CSS, TailwindCSS, JavaScript, React.js, Redux, Node.js, Next.js, Express.js
- **Backend & Databases:** MySQL, PostgreSQL, MongoDB, REST APIs, CRUD, JWT Auth, Socket.io
- **Tools:** Git, GitHub, Cloudinary, Postman, VS Code, Figma
- **Problem Solving & Soft Skills:** Verbal Ability, Logical Reasoning, Teamwork, Leadership

ACHIEVEMENTS

- **DSA Practice,** Solved 400+ problems across LeetCode, CodeChef, and other platforms, enhancing problem-solving skills.
- **Coder Rating,** Achieved 1400+ rating and 2 star coder in CodeChef.
- **EAMCET & JNV,** Secured top ranks in EAMCET (TS: 4200) and qualified JNV Entrance (Top 2%).
- **Leadership Experience,** As team lead, built the Flask/MongoDB web platform for VisionEdge's navigation model
